A synonymical, and distributional checklist of the *Papilionoidea* and *Hesperioidea* of East Mediterranean countries, including Turkey (*Lepidoptera*)^{1, 2}

Muhabbet Kemal Ahmet Ömer Koçak

Abstract: A synonymical, and distributional checklist of the *Papilionoidea* and *Hesperioidea* of East Mediterranean countries, including Turkey (*Lepidoptera*). *Priamus* (Suppl.) 25: 1-162, 42 Pls.

This is the first modern article in the Lepidopterology, dealing with the checklist of the butterflies of the East Mediterranean countries, Turkey, Cyprus, Syria, Lebanon, Israel, Jordan, and Iraq. Totally 448 species in 9 families are listed synonymically. Range of each species and subspecies is explained as codes of the countries. Distribution of each species and subspecies in Turkey is mentioned with the official provincial numbers. All the information are based upon the info-system of the Cesa; therefore the basic text of this article is extracted from the database system arranged and maintained regularly by the authors. Images used are from the archive of the Cesa and photographed by the first author under natural conditions, in various years and seasons. Identifications of all taxa including images belong to the authors. A selected bibliography of the butterflies of the seven countries is given alphabetically according to the names of the authors. It is also based upon the Library of the Cesa.

Key words: Butterflies, *Lepidoptera*, checklist, distribution, East Mediterranean countries, Turkey, Syria, Lebanon, Israel, Jordan, Iraq, Cyprus.

Within the frame of the Entomofauna³ projects of the Cesa⁴, authors published recently the list of the valid names of the pterygot insects of the Middle East countries (except *Lepidoptera*).⁵ Totally 12999 species based upon the info-system of the Cesa were listed in that article.⁶

¹ The planned date of the publication of this study was 23 October. Unfortunately this act couldnot be realized on that date, due to a very strong earthquake (magnitude 7.2) with the epicenter 16km N of Van city, where exactly we live. Currently, more than 600 people dead, and 2600 people wounded. Thank God, we, quake survivors, are healthy, and gradually engaged in daily works and our scientific activities again. The media reported this disaster worldwide. We received only a single condolence message offered by Mr. Eddie John from abroad. We sincerely thank to him for his kindness.

⁵ Koçak, A.Ö. & M. Kemal, 2010, Synonymic and distributional list of the pterygot insects of Middle East (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 88. *Priamus* (Suppl.) 18: 2888-3186.

⁶ Koçak & Kemal (2010) mentioned that together with the *Lepidoptera*, number of pterygot insects of the Middle East reached to 20389. Total number based upon the database of the Cesa is now 23813. According to our knowledge, actual number of the pterygot species of

In the present publication, the butterflies of the East Mediterranean countries, Turkey, Cyprus, Syria, Lebanon, Israel, Jordan, and Iraq, are listed. Totally 448 native and migrant species in 9 families are given with their synonymous names, ranges and distributions (in blue colour) in Turkey as codes.⁷ Codes of East Mediterranean countries are in bold. In the list, the valid subspecies are also given with the same information of the species. The genera, subgenera, if exist sections and subsections are mentioned with their synonyms. Among the synonymous names, the symbol # denotes nomenclaturally unavailable name. All the information are based upon the information system of the Cesa; therefore the basic text of this article is extracted from the database system arranged and maintained by the authors regularly. Images used here are from the archive of the Cesa and photographed by the first author under natural conditions, in various years and seasons. Identifications of all taxa including images belong to the authors. A selected bibliography of the butterflies of the seven countries, based upon the Library of the Cesa, is given alphabetically according to the names of the authors.

As it has already been mentioned Koçak & Kemal (2010: 2888), there are still planned expeditions and publications on the butterflies of the East Mediterranean countries.

Number of the butterfly species of the countries listed here is as follows: Turkey (408, Papilionoidea 365, Hesperioidea 43), Cyprus (53, Papilionoidea 49, Hesperioidea 4), Syria (101, Papilionoidea 89, Hesperioidea 12), Lebanon (144, Papilionoidea 120, Hesperioidea 24), Jordan (84, Papilionoidea 71, Hesperioidea 13), Israel (102, Papilionoidea 86, Hesperioidea 16), Iraq (151, Papilionoidea 129, Hesperioidea 22).
